A healthy man experiences a stroke and lasting damage after consuming many energy drinks.

A man consumed eight energy drink cans daily, exceeding the recommended caffeine limit. He was hospitalized with stroke symptoms and dangerously high blood pressure (254/150 mm Hg). After ceasing energy drinks, his blood pressure normalized, but he still experiences permanent numbness in his left hand and foot. Doctors linked his stroke to the combination of caffeine and other ingredients like taurine and guarana, highlighting the cardiovascular risks of excessive energy drink consumption. This case underscores the need for increased public awareness and regulation regarding energy drink sales and advertising.

Powerful 7.5-magnitude earthquake strikes Japan's northeast

A 7.5-magnitude earthquake recently struck northeastern Japan, leading to the evacuation of approximately 90,000 residents and the issuance of initial tsunami warnings. Fortunately, the tsunami waves were smaller than expected, alleviating concerns. Emergency services swiftly evacuated at-risk areas, while local authorities initiated damage assessments and provided support to those affected. Community centers emerged as shelters and resource hubs, exemplifying resilience as neighbors came together to assist one another. As life gradually returned to normal with the reopening of schools and businesses, this event highlighted the vital importance of preparedness and community solidarity in the face of natural disasters.

Nobel Peace Prize winner Machado credits U.S. support for her escape from Venezuela.

After discreetly escaping her homeland, Nobel Peace Prize laureate María Corina Machado stated on Thursday that she received assistance from the United States government to emerge from hiding in Venezuela and accept her award. At 58 years old, Machado attributed the "decisive" actions of President Donald Trump for rendering the Venezuelan regime "weaker than ever," underscoring her continued support for the White House as it increases military pressure on Caracas. She expressed her commitment to returning home to confront the "tyranny" of President Nicolás Maduro. "Yes, we did receive support from the United States government," Machado remarked during a press conference in Oslo, Norway, discussing the perilous and secretive nature of her journey from Venezuela.

It was discovered that Neanderthals mastered fire — 400,000 years ago

Evidence shows Neanderthals were using fire in the UK around 400,000 years ago, pushing back the timeline by 350,000 years. This discovery challenges the view of Neanderthals as primitive, highlighting their social interactions, cognitive abilities, and cultural practices. Controlling fire likely improved nutrition through cooking, provided light, and offered protection, while fostering community gatherings for storytelling and knowledge sharing. This new perspective portrays Neanderthals as complex beings capable of emotions and creativity, emphasizing their ingenuity and adaptability, and enhancing our understanding of human evolution and interconnected history.

Will blockbuster obesity drugs revolutionize addiction treatment?

Neuroscientist Sue Grigson received an email from an individual who successfully overcame opioid addiction, as well as the medication intended to aid in his recovery, by utilizing semaglutide (Ozempic). Intrigued by his success story, Grigson commenced an investigation into GLP-1 drugs and their impact on the brain's reward system. Her preliminary studies have yielded promising results, suggesting that these medications may effectively reduce cravings and withdrawal symptoms in animal models. Grigson intends to initiate clinical trials to evaluate the efficacy of semaglutide in human addiction recovery. This potential new application of semaglutide has generated considerable interest within the scientific community, fostering hope for individuals grappling with addiction.

Marshmallow
Hot Cocoa Cookies

Dripping with gooey
marshmallow and
draped in a luscious
cocoa glaze, these
fudgy cookies are
sure to tickle the
taste buds of
everyone, from
sugar-loving kiddos
to even the fussiest
of grown-ups!

- *Cookies Ingredients:**
- 1/2 cup unsalted butter (1 stick), softened
- 1/2 cup light brown sugar (107 g), packed
- 1/4 cup granulated sugar (50 g)
- 1/2 tsp kosher salt
- 1 large egg
- 1 tsp pure vanilla extract
- 1/2 tsp baking soda
- 1 1/2 cups all-purpose flour (180 g)
- 1/4 cup hot cocoa mix
- 1/4 cup unsweetened cocoa powder (21 g)
- 12 marshmallows, halved
- *Glaze Ingredients:**
- 2 Tbsp unsalted butter, softened
- 2 Tbsp unsweetened cocoa powder
- Pinch of kosher salt
- 2 Tbsp steaming hot water
- 1 cup confectioners' sugar (113 g)

- *To Whip Up Some Scrumptious Cookies:**
1. **Whip Up the Dough**:
Butter, sugars, and salt strut their stuff together, then egg, vanilla, baking soda, flour, hot cocoa mix, and cocoa powder join the party! Chill in the fridge for 2 hours to let the flavors mingle.
 2. **Get the Baking Sheets Ready**:
Crank up the oven to a toasty 375°F, line the sheets with parchment, and roll out 1½ Tbsp. dough balls, giving each its personal space—8 per sheet!
 3. **Bake Those Beauties**:
Let them bask in the oven for 8 minutes, then pop half a marshmallow on top, giving them a 2-minute encore to melt into gooey goodness.

*Whip Up the Glaze**:
Mix butter, cocoa powder, salt, and hot water in a whirlwind of deliciousness; stir in confectioners' sugar and drizzle over the cookies, tweaking the glaze to your heart's content!
